Hi Ken:

I just want you to know I've a a great day thanks to your companion music folder. This is the first chance I've had to really go through it, listen to it, and play through some of the pieces. It's been a blast. I introduced the students to The Ghost Walk and they were so excited when they left class. I came home and found myself alone this Friday night and spent two hours practicing cello melodies - and just getting a sense of the pieces. Frankly I think it's a life saver. With the limited classroom instructional time with the children, it provides an incredibly fun totally appropriate elementary level get in there and wow them experience for the kids. I hope Rick plugs this with the folks. Will you at any time be putting the full accompaniment to Ghost Walk on your web page? It would be so great to motivate the children's practice. (I also noticed a spelling mistake in your new post for MacNamara's Band) No big deal to me but you may want to know it. Thank you for reminding me of the joy which brought me to this profession!

Most sincerely,

Terri Moraca
